Platform
Overview

Cyber Threat Intelligence

The Cyjax Platform has been developed from the ground up, using proprietary technology designed specifically to work with cyber threat intelligence.

INTRODUCTION

Applying this innovative, AI-enabled technology, combined with our highly experienced team of world class analysts, the Platform allows users to easily acquire, transform and disseminate data, instantly creating a cyber threat intelligence looking glass. It wraps neatly around your organisation, providing contextualised views of associated risks, and real-time monitoring of emerging threats to your critical assets, enabling rapid response to cyber-related events, technical or otherwise.

HOW IT WORKS

The Cyjax Platform is an agile digital intelligence framework built for the modern cloud. It connects internal security incidents and events with external risk information to provide real-world enrichment and instant threat assessments.
It comes with its own 'app store' that delivers the essential components of your threat intelligence toolkit. It can be deployed anywhere in minutes. Our team of analysts and developers work around the clock to support and to sync the Platform with your business needs.

CYJAX — Cyber Threat Intelligence

- THREAT INTELLIGENCE
- SOCIAL MEDIA
- LIVE INTELLIGENCE
- TRAINING & SIMULATION
- PHISHING SIMULATOR
- BREACH ALERT
- SECURITY & RISK ANALYTICS
- API ENDPOINT ARCHITECTURE

Platform Components

THREAT INTELLIGENCE

Strategic, operational and tactical intelligence services, with self-service and fully managed options. Stay up-to-date on what is happening globally and all around your business. Monitor your third-party supply chain. Define dynamic strategies to keep your security posture current and in sync with your adversaries, using:

- Global incident reports
- Country risk profiling
- Hacker, operation, security researcher and Darknet seller profiling
- Darknet access
- Global data leaks
- Vulnerability intelligence and management
- Global multilingual mainstream news aggregator
- IntelliMetrics and analytics

SOCIAL MEDIA

Keeping you plugged in across the social media sphere and providing up-to-date intelligence on activities that could impact your brand reputation or lead to an attack. Features include:

- Digital profiling (Executive)
- Social media monitoring
- Real-time sentiment analysis
- IntelliMetrics and analytics

LIVE INTELLIGENCE

The world-renowned Cyjax human intelligence team working proactively to protect your brand reputation and assist during ongoing events and crisis situations:

- Direct impact assessments
- Situational awareness reporting
- Incident support
- Knowledge and skills gap fillers

TRAINING & SIMULATION

The Cyjax training and simulation feature is designed to promote and test security awareness and situational readiness throughout your organisation. A suite of tools and services to maintain an effective awareness program year-round.

PHISHING SIMULATOR

Craft and distribute realistic phishing campaigns to test awareness and system readiness

SOC readiness test

Dynamic scenarios planned to test system and staff readiness

Basic awareness training

Tailored workshops aimed at raising awareness

BREACH ALERT

Drawing from darknet, deepweb, and clearnet sources and making use of advanced methods and awardwinning technologies to ensure you are the first to know when your assets have been exposed.

SECURITY & RISK ANALYTICS

Advanced metrics designed to provide visual output of associated risk information combined with operational and strategic threat intelligence. Our custom built IntelliMetrics toolset is designed to bring big data analytics to every end user through simple natural language interrogation.

API ENDPOINT ARCHITECTURE

The Cyjax Platform can work with almost any API endpoint architecture. Our platform supports JSON, STIX/TAXII and CEF formats out-the-box. A complete developer guide and control framework enables ad hoc integrations between platforms. Our development team is also on hand to assist. Available integrations exist for the following:

- Qradar
- HP Arcsight
- Splunk
- IBM I2
- Any third-party platform with REST API support

It wraps neatly around your organisation, providing contextualised views of associated risk and realtime monitoring of emerging threats to your brand assets, enabling rapid response to cyber-related events.

ABOUT CYJAX

We aim to safeguard your data and secure your future.
Our mission is to be the preeminent supplier of digital threat
intelligence for enterprises, SMEs and governments around
the world. Established in 2012, Cyjax has built a reputation
for producing world class cyber threat intelligence across
a broad range of areas.

We have developed our own innovative technology from
the ground up. This, combined with years of experience
in the intelligence community, has led to Cyjax evolving into
a class-leading digital security and intelligence company.
